WHOLESALE TRADE LIST

U.S. Department of Agriculture
Library
Washington, D. C.

Autumn
1905

HARDY ORNAMENTALS

FOR over half a century we have made this our specialty, ignoring fruits and tender plants. To-day we enjoy the confidence of patrons in all parts of the country and ship to foreign shores *successfully*.

¶ We do not sacrifice everything in a desire to undersell other nurserymen. Our first object is to grow good stock—the thrifty, well-rooted kind. To do this, we spare no means to follow the methods learned by long experience.

¶ Ample manure, thorough cultivation and constant care and attention mean an increase in the cost of production but they also mean a decided improvement in the quality, and by adopting these measures, we have developed three hundred acres of the kind of stock that is sure to please the purchaser.

¶ Further information freely and cheerfully given.

Wholesale Trade List

AUTUMN 1905

IN preparing this, our Wholesale Trade List for Autumn 1905, we have aimed to present our large collection of Hardy Ornamentals to the purchaser in the most concise form. With this object in mind and in view of the fact that it is intended for the trade, illustrations and descriptions have been purposely omitted. To those unacquainted with the stock, however, we will gladly furnish descriptive matter upon application. In fact, we delight in giving information pertaining to Hardy Ornamental Plants and inquiries are solicited.

Customers are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment.

Responsibility.—After goods are placed on board cars here we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

All Claims must be made upon receipt of goods.

Terms Cash, on or before delivery to express or railroad agents, unless by special arrangement.

Two Hundred and Fifty, twenty-five and five will be furnished at the thousand, hundred and ten rates respectively.

Packing Charged Extra, but only sufficient to cover cost of time and material.

Post Office Orders payable at Dreshertown, Montgomery Co., Pa.

Telegraph Office, Ambler, Pa.

Visitors are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train you take stops at these stations.

Notice.—It is necessary that you should **Telephone** us (Bell Phone, 26 Fort Washington; Keystone Phone, 76-Y Jenkintown), in advance of your coming, so that we can send a carriage to the station for you. Our office is $2\frac{1}{2}$ miles from either station.

[COPY OF CERTIFICATE]

THE COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock No. 744.

This is to certify that the stock in the nursery of THOMAS MEEHAN & SONS, INC., of Dreshertown, County of Montgomery, State of Pennsylvania, was duly examined in compliance with the provisions of the Act of Legislature of Pennsylvania, approved the 10th day of June, A. D., 1901, and it was found to be apparently free from San Jose Scale and other dangerously injurious insect pest or pests. Examination made by GEO. C. BUTZ, Inspector, Department of Agriculture.

This Certificate expires July 31, 1906.

Dated Harrisburg, Pa., August 17, 1905

GEO. C. BUTZ, Inspector.

Inspected August 3rd, 1905.

A. B. Critchfield,

Secretary of Agriculture.

Deciduous Trees

"Trans." signifies the stock has been once or more transplanted.

"Seed." that it is still in seedling beds.

Where stock is marked "Specimen" it indicates trees that have been several times transplanted, of good shape, straight stems, and have been grown especially for individual specimen trees.

5 to 6 ft. trans. heavy.....	4 00	35 00	
6 to 7 ft. trans. heavy, specimens...	5 00	40 00	

The Acer Ginnala is one of the best bush-like trees in cultivation, and should be largely used in park and cemetery plantings, either as a single specimen, or in large masses. Nothing surpasses the richness of its coloring in the fall. It can also be used for ordinary hedges. It grows dense and compact and will stand any amount of shearing. It is perfectly hardy, and we can especially recommend it for this purpose.

JAPANESE MAPLES

All of the Japanese Maples offered by us are of our own propagation. Customers who have planted them side by side with the rough, hide-bound and poorly rooted imported Japanese plants quickly recognize the merits of our home-grown stock. It is worth the little additional price charged over the imported stock. Note that most of the stock offered is pot grown. They transplant more easily by handling them in that way. All field-grown stock has been frequently transplanted.

3 to 4 ft. trans. extra heavy bushy plants	3 50	30 00	
We have perhaps the largest and finest stock of Judas, both American and Japanese, in the country. The plants are strong, bushy and well rooted. We call particular attention to the specimen sizes of both varieties. These were recently transplanted, and set sufficiently wide apart in the rows to afford room to develop. They are extremely useful where plants are required to produce immediate effect.

OAKS

We believe we are the largest growers of Oaks in the United States, and we feel sure that there is no finer stock growing anywhere. Our soil seems particularly adapted to the growth of the Oak. Our trees are well furnished, with bushy heads, and good straight stems. They are stocky and have the best of roots. We get practically no tap root, and in digging we do not allow our men to cut the roots,—they are taken out with the whole root. Note the heavy specimen trees which we offer. They are something extra fine, and where a large, well-developed specimen is required, nothing better could be gotten.

Deciduous Shrubs

"Trans." indicates that the plant has been once or more transplanted.

"Seed." that it is still in seedling beds, not transplanted.

Shrubs marked "Specimen" are large, well-developed plants that have been several times transplanted and given room to develop.

This is exceptionally fine stock for planting for immediate effect.

The Desmodiums are excellent plants of an herbaceous character for setting in shrubbery beds. They bloom in August and September. Being of an herbaceous character the tops die to the ground in the fall and shoot up in the spring stronger than the year previous. They are remarkably attractive, and are one of the most valuable plants of this character.

This is one of the new varieties of Deutzia. It is of stronger growth than the gracilis, but not nearly as large as the crenata. It has white bunches of flowers which are borne in great masses quite as abundant as the gracilis. Indeed, it is being largely used in place of the gracilis.

We grow a great many thousands of this plant every year, and supply the trade largely with them. Our plants are good and strong and well rooted. We desire to call particular attention to the 3½ to 4 ft. and the 4 to 5 ft. stock. They are very heavy and bushy. Other stock may be offered cheaper, but a comparison of the plants will show that our plants are twice as bulky as the cheaper stock of the same height.

LIGUSTRUM IBOTA

The severe winters of the past two years have injured the *Ligustrum ovalifolium* or California Privet to such an extent that planters have ceased to use it as largely as in the past, a more hardy variety being required. The *Ibota* Privet has all the merits and good qualities of the California Privet, and in addition it is very hardy, and for this reason it is largely superseding the California. We have probably the largest

stock of 2 to 3 ft. and 3 to 4 ft. sizes in the country. They are all good bushy plants, transplanted, and with good roots. We recommend this Privet as being the best of all the varieties for hedging purposes.

BEWARE of the so-called *Ligustrum Ibota* imported from Europe. It is not the true variety and is not hardy. We have imported the so-called *Ibota Privet* from many European sources and in every case we have received the *sinensis*, which is not hardy very far north of Philadelphia and not at all in the Northwest.

Two year, budded, trans.....	1 50	12 00	100 00

We call particular attention to the new hybrid rugosa rose Conrad Ferdinand Meyer. We flowered it on our grounds for the first time this year and are very much pleased with it. It is a strong grower, having a great many of the characteristics of the rugosa. The flowers are double and full. The outer petals are of a very light pink, while the inner petals are of a darker pink and the flowers are very fragrant. It seems to be a free bloomer, and we believe that it will be found extremely hardy. The new shoots springing up from the roots are very strong and vigorous, and these shoots, together with the leaves on them, are of a purplish red color, making a very striking appearance. These roses should be found in all collections, and as a bedding rose, where a good hardy variety is required, we know of nothing better.

NEW LILACS

White, Red and Purple, Single and Double

There have been a great number of new lilacs introduced within the past five or six years. The list of varieties is a long one, but many of them are quite similar in general appearance. The following list has been selected for its distinct character, and we believe are the best of the many varieties.

This is the *Viburnum* so largely planted throughout the New York parks. The leaves are large, of a dark green color and of a thick leathery character. The flowers are white in flat heads. The leaves remain very late on the plants. It is a very desirable variety for mass planting.

5 to 6 in. trans.....	1 00	9 00	80 00
6 to 8 in. trans.....	1 25	10 00	90 00

In many parts of the United States and Canada, Box Edging is not hardy, and a low, dwarf and compact plant is required as a substitute for it. The *Viburnum opulus nanus* has been found to be an excellent substitute for the Box Edging. It is naturally of a dwarf habit and will stand a lot of shearing, so that it can be kept down to a very small size. It does not bear any flowers and the leaves are smaller than the other varieties of *Viburnum*. It is perfectly hardy and can be planted in any part of the United States and Canada.

Viburnum oxycoccos (opulus), High Bush Cranberry

" tomentosum

15 to 18 in. trans.....	1 00	8 00	
2 to 3 ft. trans.....	1 25	10 00	
3 to 4 ft. trans.....	1 50	12 00	
4 to 5 ft. trans.....	2 00	18 00	
5 to 6 ft. trans. specimens.....	3 50		

The *Viburnum tomentosum* is of a similar character and habit to the *Viburnum plicatum*, but instead of having balls of flowers, they are flat headed. In leaf and general growth it is about the same as the *plicatum*, and in fact it is frequently mistaken for that variety. It is perhaps a little stronger

grower than the plicatum, and in some respects it is to be preferred. We have a particularly large and fine stock of this plant, and call attention to some of the specimen plants which we offer.

Evergreens

All our evergreens have been once or more transplanted, the larger sizes several times, and the choice varieties we move in a period not exceeding two years. These choice varieties are all dug with a ball of earth and the ball sewed in a mat. This makes transplanting almost an assured success. Our evergreens should not be confused with the low-priced plants frequently offered. We move them constantly in order to secure a good root growth, and they are less liable to loss when shipped.

Vines and Climbers

We direct particular attention to our "Pot Grown Vines." They are well-established plants, strong, vigorous and well grown. They are shipped without breaking the ball. The best results are obtained from using potted plants. Potted plants are especially recommended for planting in the fall rather than field grown stock.

Nurserymen's Supplies

THE BEST NURSERY SPADE

Either Square or Taper Blade

Send Your Order Now. Don't Leave It Too Late

D Handle, Double Strap, Reinforced Nursery Spade. Weight, 9¼ lbs.

We have experimented with a number of different makes of nursery spades, but find this to be the strongest, best and most durable on the market. We have been using this spade for a number of years, and it will stand more hard work than any other make. It is strapped full length of handle, both back and front, and half way up it has double straps, strengthening it in what otherwise would be its weakest parts. When ordering state if straight or taper blade is wanted. Price, \$1.75 each; \$20.00 per doz

PRUNING SHEARS, BUDDING AND PRUNING KNIVES

The sheers and knives offered, excepting the "Empire," are the celebrated "Maher & Grosh" make, which is sufficient guarantee of their excellence. No better knives are made. All blades are guaranteed "razor steel" and have been thoroughly tested.

Bear in mind, our prices are for the goods POSTPAID at your risk. If you wish them by registered mail add eight cents to your order.

PRICES INCLUDE POSTAGE

Pruning Knife "A," 75c. each, 6 for \$3.75

This is the best light-weight pruning knife on the market, and is suited to all general work. Ebony handle.

Pruning Knife "B," 85c. each, 6 for \$4.75

Round handle, steel cap on end. Strong blade. Made for nurserymen who want a strong tool and keen edge. Blade oil tempered. The strongest pruning knife made.

The "Empire" Budding Knife, 80c. each, 6 for \$4.50

We warrant it. This is the finest budding knife on the market. Made expressly for us, and we warrant every knife to be first-class. Blade closes. Best razor steel. All ivory handle, tapered at end for raising the bark. If you want a good, durable budding knife, buy the "Empire."

Budding Knife "C," 25c. each, 6 for \$1.30

Stationary blade. High temper, equal to any razor.

Budding Knife "D," 35c. each, 6 for \$2.00

Cocoa handle, razor steel. Blade closes. The end of the handle is tapered to form a wedge for raising the bark.

Pruning Shears "E," 75c. each, 6 for \$3.90

These are A No. 1 in quality and are the kind in general use

Pruning Shears "F," \$1.00 each, 6 for \$5.75

This is a forged steel pruner, patent spring of wonderfully easy but powerful working capacity. There is not a stronger or better pruning shear on the market. It will out-wear two of any other style. The best is the cheapest in the end.

NEPONSET PAPER FLOWER POTS**UNBREAKABLE, LIGHT, ECONOMICAL**

Plants and Cuttings packed for shipment in our Neponset Flower Pots have a better protection than when wrapped in papers.

A great saving in freight is made over clay pots, weighing only one-tenth as much and no breakage. Made from the celebrated Neponset paper, which is absolutely water-proof. They are so constructed as to give ample drainage and allow plenty of air to the roots of the plant.

Send for sample and prices on seven different sizes, and compare with clay pots.

REGISTERING TREE CALIPER

Capable of measuring a tree from ⅛ inch up to 4 inches caliper. Can be adjusted to any size within this capacity. Nickel-plated. Postpaid for 75 cents.

TREE AND SHRUB SEEDS

We issue a special catalogue of these. It will be mailed on application.

OUR BOOK DEPARTMENT

We have made it a point to keep posted on the different works pertaining to agriculture and horticulture, and if you need a book treating on any particular phase of these subjects write us for a list.

Here are two books of which we have sold a great many copies:

Fumigation Methods. By Willis G. Johnson, formerly State Entomologist of Maryland. A practical treatise upon new, cheap, simple and effective methods of exterminating insect pests and various other vermin in fruit orchards, greenhouse, nursery, mill, granary, elevator car, ship and other enclosures. Written in a popular non-technical style. Profusely illustrated. 5 x 7 inches; 250 pages; cloth; price, \$1.00 postpaid.

Nursery Book. By Prof. L. H. Bailey of Cornell University. Eighth edition. This is a standard work of reference and is simply essential to every nurseryman. Thoroughly practical and describes fully and clearly the processes of budding, grafting, seed-sowing, etc., as well as many other important items of nursery work, with convenient indexes, etc.; 365 pages; 162 illustrations; price, postpaid, \$1 00.

A synopsis of either of the above books will be sent on application.

THE GARDEN-CRAFT SERIES

The Horticulturist's Rule Book. Eighth edition, 312 pages, 75 cents.

The Nursery Book. Eighth edition, 365 pages, . . . \$1.00

Plant-Breeding. Third edition, 293 pages, . . . \$1.00

The Forcing Book. Fourth edition, 266 pages, . . . \$1.00

Garden Making. Fifth edition, 417 pages, . . . \$1.00

The Pruning Book. Fourth edition, 545 pages, . . . \$1.50

The Practical Garden Book. Second edition, 250 pages, . . . \$1.00

MANETTI ROSE STOCKS

5 to 10 mm. at \$1.25 per 100; \$10.00 per 1000
 Medium grade at \$1.00 per 100; \$9.50 per 1000; \$9.00 per 1000 in lots of 10,000 and over.

These medium stocks have been graded especially for us and are of a size suitable for florists' use. They average about 5 mm. and are nicely rooted. We seldom secure enough of this particular grade to fill all orders, and although we have about 50,000 still unsold at this writing, it will be well not to defer placing your order.

Box and packing charged additionally at cost.

CONDITIONS OF SALE.—All offers and acceptances of orders are subject to our receiving the full quantity for which we have placed orders with our growers and seed collectors. Failing to get these amounts from them, we reserve the right to reduce proportionately all orders that have been booked.

GUARANTEE. While we try to procure the very best seed on the market, we give no guarantee, either expressed or implied. Samples will always be furnished when applied for. If the seeds are not accepted on these terms, we must be notified at once. If they are kept it will be taken as proof that they are satisfactory.

ALL CLAIMS must be made upon receipt of goods. **RESPONSIBILITY.**—After goods are placed on board cars here we assume no responsibility for their safe delivery.

WHITE PINE SEED

Fresh seed. Not plentiful. We have only a small quantity when compared with the large amount now used for forest planting. Order NOW if you wish any.

\$2.75 per lb.; 30 cts. per oz.

FRUIT SEEDS

We spare no expense to procure the best. Naturally they cost more but the experienced growers share our opinion that quality demands first consideration; price secondary.

We are in touch with most reliable sources, both here and abroad and offer the following seeds as being the best obtainable. Samples free.

It is to your advantage to order early.

French Crab

We supply most of the western growers so our seed must prove satisfactory. One customer wrote last spring: "*The seed was of the finest quality and has given ideal results. If you are booking orders for next season you may enter our order for * * *.*" Another large grower wrote: "*Your favor received with sample of crab seed, which is fine; we think the seed is better this year than usual, but have seen none as good as the sample you sent us.*" These expressions are but natural for the seed comes from an excellent source.

40c. per lb; \$10.00 per bu.; ~~3 bus. at \$9.75 per bu.;~~
~~5 bus. at \$9.50 per bu.; 10 bu. or over at \$9.00 per bu.~~

Crab Seed for Fall Planting

For those desiring to plant in the autumn we offer a limited amount of last season's crop at the same price. This seed has been kept in cold storage all summer and is as fresh and plump as the day it was collected. Write for samples.

Conditions.—All offers and acceptances of orders are subject to our receiving the full quantity for which we have placed orders with our growers and collectors. Failing to get these amounts, we reserve the right to reduce proportionately all orders that have been booked.

ALL ORDERS SHOULD BE PLACED EARLY.

October 25, 1905.

Kieffer Pear

We are headquarters. The seed is extracted and cured under our personal supervision. Fresh seed of finest quality.

\$2.25 per lb.; 25 lbs. at \$2.00 per lb.; 50 lbs. or over at \$1.75 per lb.

Peach Pits

These are the genuine small southern natural seeds, which as all growers know, produce the best seedlings. Our supply is limited. Order now. **STOCK EXHAUSTED.**
15c. per lb.; \$1.75 per bu.; 25 bu. at \$1.50 per bu.

French Pear

New crop will not be ready until usual time—about February, but if Autumn planting is desired we have a small quantity of last year's seed at same price. It has been kept in cold storage and is in fine condition. Sample free.

\$1.25 per lb.; 5 lbs. at \$1.10 per lb.; 10 lbs. at \$1.00 per lb., and 50 lbs. at 95c per lb.

Myrobolan Plum

Good, sound seed. Importation just arrived. Supply limited.

40c. per lb.; \$11.00 per bu.; 3 bus. at \$10.00 per bu.;
5 bus. at \$9.00 per bu.

Quince

Fresh seed. Will be ready about the latter part of January or early in February.

\$1.50 per lb.; 5 lbs. at \$1.25 per lb.;
10 lbs. at \$1.00 per lb.

While we try to procure the very best seeds on the market **WE GIVE NO GUARANTEE**, either expressed or implied. Samples will always be furnished when applied for. If the seeds are not accepted on these terms, we must be notified at once. If they are kept it will be taken as proof that they are satisfactory. All claims must be made upon receipt of goods.

FRUIT STOCKS

Needless to say our stocks are of first-class quality in every instance—healthy and possess good roots. It may avert disappointment to order early.

Box and packing charged additionally *at cost*.

MANETTI ROSE

Special Size for Florists

We have met the difficulty experienced by florists in securing Manetti of an even and suitable size for their purposes, by making a special grade of selected stocks. Not the large kind as generally used by nurserymen, nor the very small “-pindley” sort, but of a medium thickness, suitable for potting in 2½ inch pots—just right for florists—and *nicely rooted*.

This is the first season that we have been able to secure a quantity above the number required for advance orders. They are in great demand. Better order early.

\$1.00 per 100; \$9.50 per 1000; \$9.00 per 1000
in lots of 10,000 and over.

Large Manetti Stocks

This is the size sought by most nurserymen. They average 5 to 10 mm. (approximately one to two-fifths of an inch). Better rooted than most stocks.

\$1.25 per 100; \$10.00 per 1000.

The Red Star Brand
Sole and Exclusive Importers

RAFFIA

"Red Star" Brand

1 pound	15c. per lb.
1 pound (post paid)	30c.
25 pounds	14c.
50 pounds	10c.
100 pounds	9 1/2c.
1 bale (about 225 lbs.)	9c.
2 bales	8 1/2c.
5 bales	8 1/4c.

THE MEANING OF "RED STAR" BRAND

"Quality guaranteed" and you have it in a nut shell. The expression is trite, 'tis true, but do you know the extent of its significance when applied to Raffia? There is no commodity under the sun the quality of which is more uncertain and uneven, too than Raffia. The natives of Madagascar pay scant attention to uniformity in packing. Some of the finest material we ever saw and represented to be of an A number one grade, came to this country with a lot of coarse, green strands mixed through it.

You can appreciate then, the confidence we have in "Red Star" brand when we *offer to replace any that proves inferior.*

"Red Star" brand is a good, even grade. Not always the cheapest in price, but the most satisfactory kind in the market. Will you have a free sample?

Evergreens for Window Boxes

Every plant is a specimen. They possess not only that shapely, well-balanced appearance—in some instances obtained only by shearing—but, having been transplanted recently, their root system is all that could be desired.

Five of a kind at the 10 and 25 at the 100 rate.
Box and packing charged additionally at cost.

Quercus rubra. Red Oak.

THE use of our American Oaks for Street, Avenue and Boulevard planting is not a new idea. It has been going on for years and in Washington, Boston and Baltimore may be found many streets where Oaks are successfully used for this purpose.

The Oak is not a slow grower, as is commonly supposed. On the contrary under ordinary conditions and if properly planted it will make as much growth in a year as the Norway and Sugar Maple and give greater satisfaction.

In most cities it is difficult to grow shade trees. They do not get sufficient water and the soil is poor, consequently it is necessary to use deep-rooted trees. In this respect the Oak is especially good.

All sorts of insects prey on the leaves of trees to more or less extent, and in cities they are particularly troublesome—but they do not attack the Oak.

In planting Oaks it is necessary that they be severely pruned at once—all side branches should be cut back to about a foot from the main stem. If this is done, every tree will grow and the new shoots will make from one to two feet the first year.

For street planting we particularly recommend the Pin Oak.

Our stock of Oaks of all sizes is the largest in the country.
